About IJABE

IJABE is a non-profit organization

Classification of the Journal: Academic/Scholarly

Subject Category: Engineering

Frequency: Quarterly

Format: Online

ISSN: 2822-2237

Language: English

Indexed and Peer Reviewed: Yes

Publisher: Dr. Caglar Cengizler (Izmir Democracy University, IZMIR,
TURKEY)

Contact: ccengizler@ijabe.online

Address: Biomedical Device Technology Program, Vocational School of Health
Services, Izmir Democracy University, Izmir, Turkey

IN MEMORIAM

Second Year of IJABE

The rapid development of artificial intelligence is significantly increasing the use of computers in solving complex medical problems. As medical practice continuously updates itself with evolving technology, the concepts of scientific research and publishing are also changing and developing day by day. As the IJABE team, a non-profit publishing organization, we are excitedly following this transformation. The updating perspective of digital publishing requires enhancing traditional peer-review processes, strengthening digital infrastructures, and more voluntary efforts and time from scientists. IJABE is expanding its editorial board with esteemed scientists to continue its publishing life amidst this development and transformation. We believe that the open, renewing, and forward-looking perspective of scientists will allow us to keep up with the changes in the digital publishing. The ripples created by stones thrown towards the future should also reach publishing tools. In this regard, we, the IJABE team, have tried to do our best in our second year.

IJABE, as a young, thriving publisher in its second year, has received support from many valuable scientists. We are grateful to all the esteemed scientists, especially our chief editor, Assoc. Dr. M. K. UN, who have generously offered their time and efforts voluntarily to our team. We believe that the effort we put into keeping IJABE up and running will be rewarded in the coming years with the chance of publishing many valuable studies.
